

CAMPUS CARBON

Universal Campus Carbon Footprint Assessment & Management Platform (v2.0)

Organization:	Christ University	Reporting Year:	2025
Campus Name:	Christ University ? Kengeri Campus	Assessment Status:	Completed
Campus Type:	University / College	Total Population:	6,450 occupants
Location:	Bengaluru, Karnataka, India	Built-up Area:	138,400.0 m ² (78.5 Acres)
Standard / Protocol:	GHG Protocol Corporate Standard / ISO 14064-1 (India CEA v19 Grid Baseline)	Generated On:	02 September 2026, 10:09

1. GROSS / POSITIVE EMISSIONS	2. ELIGIBLE REDUCTIONS & REMOVALS	3. NET CARBON FOOTPRINT
2,016.63	-116.98	1,899.64
tCO ₂ e	tCO ₂ e	tCO ₂ e

1. Executive Carbon Accounting Breakdown

Scope Classification	Activity Description	Emissions (tCO ₂ e)	Share of Gross (%)
Scope 1 (Direct)	Stationary DG diesel, canteen LPG, campus fleet combustion, refrigerants	361.04	17.9%
Scope 2 (Indirect - Electricity)	Purchased grid electricity & EV charging consumption	1,406.80	69.8%
Scope 3 (Other Indirect)	Commuting, solid waste disposal, freshwater supply, wastewater STP	248.79	12.3%
Total Gross Emissions	All combined operational activity emissions	2,016.63	100.0%
Eligible Removals / Reductions	Tree carbon sequestration, verified EV savings, waste diversion	-116.98	-5.8%
Official Net Carbon Footprint	Gross Emissions – Eligible Reductions & Removals	1,899.64	94.2%

Gross Intensity / Person:	Net Intensity / Person:	Gross Intensity / Area:	Renewable Energy Share:	Waste Diversion Rate:
0.3127 tCO ₂ e/person	0.2945 tCO ₂ e/person	14.57 kgCO ₂ e/m ²	26.9%	81.9%

2. Building-wise Carbon Performance Leaderboard

Code	Building Name	Type	Area (m ²)	Occ.	Gross (t)	Red. (t)	Net (t)	tCO ₂ e/p	kg/m ²

High	Electricity	HVAC & Lighting Deep Energy Efficiency R...	Emission Reduction	-15%
Medium	Transport	Phased Fleet Electrification & EV Shuttl...	Emission Reduction	-20%
Medium	Transport	Commuter Carpooling & Green Transit Ince...	Emission Reduction	-10%
Medium	Greenery	Afforestation & Miyawaki Native Urban Fo...	Carbon Sequestration / Removal	-8%

5. Accounting Boundaries & Anti-Double-Counting Disclosures

Methodological Boundary: This assessment is executed under the operational control consolidation approach in strict accordance with the GHG Protocol Corporate Accounting and Reporting Standard and ISO 14064-1:2018 specifications.

Anti-Double-Counting Safeguards:

1. On-site Solar Generation: Solar energy consumed directly on campus displaces grid power and is reflected exclusively in reduced Scope 2 emissions. It is NOT subtracted a second time as a separate negative carbon offset.

2. EV Fleet Accounting: Operational EV charging electricity is quantified under Scope 2 electricity. Avoided transport reductions are calculated separately against an explicit ICE baseline.

3. Carbon Sequestration: Tree and vegetation biomass sequestration is modeled based on Forest Survey of India & IPCC GPG factors (22.0 kg CO2/tree/year) and reported in the eligible removals ledger.
